ALRAJHI POWER SOLUTIONS
الراجحي لحلول القوى

About Us

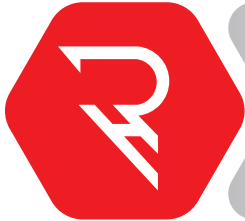

ALRajhi Power Solutions (RPS) was established in Riyadh - the capital of the Kingdom of Saudi Arabia in the year 1999, when, the company was engaged in the manufacturing of just hydraulic seals. Due to the enormous demand for hydraulic spare parts in the region, RPS expanded its arena to the business lines of Trading , manufacturing & services of hydraulic equipment's & products. RPS, in addition to its head office in Riyadh, currently has its facilities with a complete range of operations, infrastructure and teams in:

Riyadh | Dammam | Jeddah

من نحن

تأسست شركة الراجحي لحلول الطاقة (RPS) في الرياض - عاصمة المملكة العربية السعودية في عام ١٩٩٩ ، عندما كانت الشركة تعمل في تصنيع الصوف والجلب الهيدروليكية فقط. نظرًا للطلب الهائل على قطع الغيار الهيدروليكية في المنطقة ، وسعت RPS مجالها لتصنيع المعدات / العناصر / المنتجات الهيدروليكية والهوائية ، والأنشطة التجارية وأنشطة الخدمات أيضًا. بالإضافة إلى مكتبها الرئيسي في الرياض ، تمتلك RPS حاليًا منشأتها مع مجموعة كاملة من العمليات والبنية التحتية والفرق في:

الرياض | الدمام | جدة

**In ALRajhi We Believe In
More Possibilities & Powerful Solutions.**

Our Vision

Industry Leadership And Innovation That Empowers Our Customer Success in Fluid Conveyance Making Quality well-known in Saudi Arabia.

Our Mission

We integrate Best - In - Class Products And Services To Be Your Strongest Partner In Hydraulics when Your Products Move , Turn , Shape , Mold , Lift , Dig or Haul .

Our Business Lines:

Our hydraulics business provides components and custom-engineered solutions that help mobile and industrial machines dig, haul, lift, shape and mold more safely and efficiently. From pumps, valves, motors, and transmissions to hoses, cylinders, and controls – RPS hydraulics solutions provide a faster and smarter, more productive machines.

1 Manufacturing

The breadth of our product offerings comes from our deep understanding of applications and systems capabilities. Our application engineering team is available to support you from concept through design, fabrication, and project management.

2 Trading

We supply hydraulic power and motion control, fluid conveyance, and filtration products for a variety of mobile and industrial applications, including construction, mining, material handling, manufacturing, oil and gas, agriculture. Our pumps, motors, transmissions, cylinders, electrohydraulic valves, electronic controls, hoses, fittings and connectors are designed to deliver reliability, drive productivity and provide consistent performance – empowering our customers to engineer solutions that enable better results.

3 Workshop Services

Alrajhi Hydraulic offers a complete service and maintenance solution for mobile hydraulic equipment as well as for industrial hydraulic systems. We are a well-qualified and experienced team with the latest technology and infrastructure that assures the customer, professional guaranteed service to meet the ultimate satisfaction.

Our Major Brands

RPS is Backed By The Best service and support in the Hydraulics business. Built on a strong legacy of solving some of the industry's toughest challenges, the hydraulics business, together with our global network of certified Suppliers and channel partners have been supporting us to lead this business in Saudi Market.

RPS has a comprehensive portfolio of hydraulics to meet your needs

Your Reliable Partner in Fluid Power Solutions

Our Manufactured Products:

Hydraulic seals

With its best-in-class technical know-how from our Austrian partner, RPS can manufacture all types of hydraulic seals without any design limitations up to 1000 mm Dia. In order to maintain the quality of the seal products, the raw materials and semi-finished goods for manufacturing the seals are also procured from Seal Maker Austria.

Hydraulic systems

Alrajhi Offers one of the industry's leading ways to buy power units with the most flexible range of standard configurations, standard system products include simple power units, bar manifolds and pump/motor groups that are configurable with Eaton's Packaged Systems Configuration. In addition to engineered standards, we can design, manage and help install custom power units for special applications.

BINOTTO Hydraulic Wet Kits

We supply and Install New Binotto Hydraulic wet kit's of all sizes for tipping solutions

Hydraulic cylinders

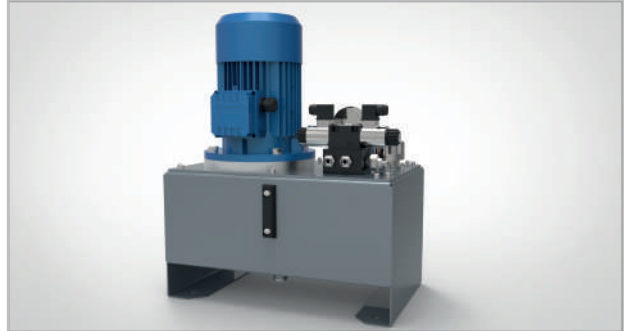

Alrajhi Hydraulics provides a wide range of cylinders in standard or custom engineered models manufactured in local or OEM supplied. Our threaded, welded, and tie rod-type cylinders easily meet the needs of the most demanding mobile & industrial applications.

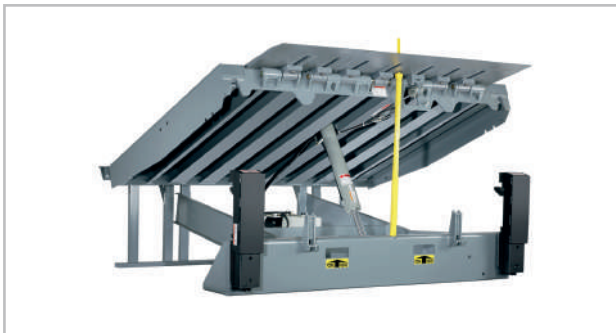

Our Manufactured Hydraulics Equipment's

Scissor Lifts

Power Packs

Dock Levelers

Road Blockers

Baling Press

- Alrajhi has comprehensive portfolio of hydraulic products to meet your needs

Hydraulic Mobile valves:

The mobile valve portfolio offers a wide range of open center, directional control, advanced and specialty-type mobile valves. Our directional control and advanced mobile valve lines are engineered for superior control, better response and operator efficiency.

Hydraulic Industrial valves:

Our industrial valves and systems are designed to provide continuous, reliable performance under the most rigorous and demanding operating conditions - delivering better performance and productivity across the full spectrum of industrial applications.

Screw-in cartridge valves:

With industry-leading cartridge valve technology and a comprehensive product selection, we give machine manufacturers the power to design a manifold or hydraulic integrated circuit (HIC) that can meet virtually any application challenge or need.

Hydraulic Pumps:

We have one of the broadest portfolios of gear, piston and vane pumps in the industry, delivering unmatched functionality and durability for a variety of mobile and industrial systems. No matter what size operating pressure you need, RPS has the perfect pump for almost any application.

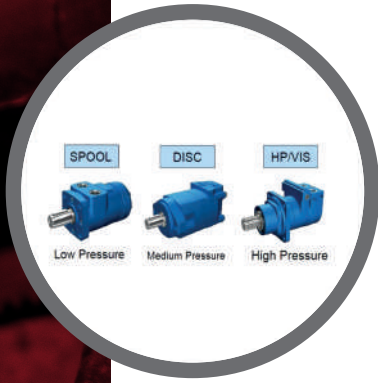

Hydraulic Motors:

Eaton's full line of hydraulic motors provides proven performance and reliability in the toughest conditions and environments.

Our Geroler®, vane/gear, and piston motors can suit a wide variety of requirements ranging from low-speed, high-torque (LSHT) to high-speed, low-torque and everything in between.

Hydraulic Steering systems:

As pioneers of hydraulic steering technology, Eaton's industry-leading portfolio of steering control units (SCUs) offer innovative solutions specifically designed to improve machine stability, reduce operator fatigue, and enhance productivity and control.

Hydraulic Tail Lifts

Tail Gates - Cantilever Lifts Light-weight aluminum / Steel platform with an anti-slip surface. with a 2-cylinder, equipped with wide lift arms, mounted on the outside of the chassis rails for most types of vehicles. equipped with a hydraulic power pack with a lifting capacity of 1 Ton & 1.5 Ton. We supply Tailgates Made in Europe.

Hydraulic Filters:

From filters and elements to complete systems and contamination monitoring, RPS has certified filtration solutions that help improve machine reliability and increase the service life of the system

📍 Location and contact details:

Riyadh Branch

AL RAJHI Power Solutions ,
Industrial Area, All Bin Abi Taleh
Road P.O.Box 15, Riyadh 11411
